

JOURNAL OF STATISTICAL PHYSICS -Volume 30, 1983

Journal of Statistical Physics accepts original and review papers in the fields of statistical mechanics and nonequilibrium and nonequilibrium processes. Papers on plasma physics, nonlinear dynamics, ergy, stochastic processes, fluid dynamics, and chemical physics are also accepted provided they are of gen-interest in relating macroscopic behavior to microscopic interactions.

general criteria for contributions are as follows. Papers should present important new results, and review rs should provide new insights. Clarity of presentation is important in all cases but, in many cases, par-ally for review papers, it is the decisive criterion for publication. Each paper should be written in such a that a clear understanding of the problem and of the results can be obtained from the abstract and intro-duction. Given that a paper meets these criteria, shorter papers are greatly preferred to longer ones. In sum-ry, the journal publishes papers with important new results or insights written clearly and concisely.

journal also accepts communications in the following departments: news of meetings, questions and ver, book reviews, and letters to the editor.

TOR-IN-CHIEF

L. Lebowitz, Department of Mathematics, Rutgers University, New Brunswick, New Jersey

TORIAL BOARD

Michael Aizenman, Rutgers University, New Brunswick, New Jersey

J. M. Deutch, Massachusetts Institute of Technology, Cambridge, Massachusetts

J.-Pierre Eckmann, University of Geneva, Geneva, Switzerland

H. Ernst, University of Utrecht, The Netherlands

Isaac Feigenbaum, Los Alamos National Laboratory, Los Alamos, New Mexico

S. Garcia-Colin, Universidad Autonoma Metropolitana, Mexico

Donald Goldstein, Rutgers University, New Brunswick, New Jersey

Robert B. Griffiths, Carnegie-Mellon University, Pittsburgh, Pennsylvania

Christian Gruber, Laboratoire Physique Theorique, Lausanne, Switzerland

J.-Pierre Hansen, Laboratoire de Physique Theorique des Liquides, Paris Cedex, France

John H. Kalos, New York University, New York, New York

Erhard Lieb, Princeton University, Princeton, New Jersey

I. Lifshitz, Academy of Sciences, Moscow, USSR

Ching-Keng Ma, University of California, La Jolla, California

Yukio Mori, Kyushu University, Fukuoka, Japan

Charles Newman, University of Arizona, Tucson, Arizona

Georges Nicolis, Université Libre de Bruxelles, Bruxelles, Belgium

Carlo Presutti, Universita di Roma, Roma, Italy

Howard Reiss, University of California, Los Angeles, California

Baruch Schuler, Technion, Haifa, Israel

G. Sinai, Landau Institute of Theoretical Physics, Moscow, USSR

Robert Souillard, Centre de Physique Theorique, Palaiseau, France

Thomas Spencer, New York University, New York, New York

Wolfgang Spohn, Rutgers University, New Brunswick, New Jersey

Erhard Stauffer, Institut für Theoretische Physik, Zulpicher Strasse, West Germany

Michael J. Stephen, Rutgers University, New Brunswick, New Jersey

George H. Weiss, National Institutes of Health, Bethesda, Maryland

Jaime Widom, Cornell University, Ithaca, New York

BOOK REVIEW EDITOR

George H. Weiss, National Institutes of Health, Bethesda, Maryland

Journal of Statistical Physics is published monthly by Plenum Publishing Corporation, 233 Spring Street, New York, 10013. Subscriptions orders should be addressed to the publisher. *Journal of Statistical Physics* is abstracted or indexed in Applied Mechanics Reviews, Current Contents, Energy Research Abstracts, Engineering Index, INSPEC - Physics Abstracts, Mathematical Reviews, Referativnyi Zhurnal, and Science Citation Index. © 1983 Plenum Publishing Corporation. *Journal of Statistical Physics* participates in the program Copyright Clearance Center, Inc. The appearance of a code line at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use. However, this consent is given on the condition that the copier pay the stated per-copy fee through the Copyright Clearance Center, Inc. for all copying not explicitly permitted by Sections 107 or 108 of the U.S. Copyright Law. It does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, nor to the reprinting of figures, tables, and text excerpts.

Subscription rates:

Volumes 30, 31, 32 and 33, 1983 (3 issues each) \$145.00 per volume (outside the U.S., \$161.00 per volume).

Second-class postage paid at New York, N.Y., and at additional mailing offices.

Printed in USA.

CONTENTS

Papers presented at the Symposium on Random Walks, U.S. National Bureau of Standards, Gaithersburg, Maryland, June 28-July 1, 1982.

ARTICLES

Introduction	249
<i>George H. Weiss</i>	
Program	251
From Classical Dynamics to Continuous Time Random Walks	255
<i>Robert Zwanzig</i>	
Stochastic Flows, Reaction-Diffusion Processes, and Morphogenesis	263
<i>John J. Kozak, Michael D. Hatlee, Matthew K. Musho, Philip A. Politowicz, and Cecilia A. Walsh</i>	
Fractal and Lacunary Stochastic Processes	273
<i>B. D. Hughes, E. W. Montroll, and M. F. Shlesinger</i>	
Nonexponential Decay in Relaxation Phenomena	285
<i>A. K. Rajagopal, K. L. Ngai, R. W. Rendell, and S. Teitler</i>	
Master Equation Techniques for Exciton Motion, Relaxation, Capture, and Annihilation	293
<i>V. M. Kenkre</i>	
Renormalization Group Approach to Random Walks on Disordered Lattices	305
<i>Jonathan Machta</i>	
Theory of Hopping and Multiple-Trapping Transport in Disordered Systems	315
<i>B. Movaghar, M. Grünwald, B. Pohlmann, D. Würtz, and W. Schirmacher</i>	
Single and Multiple Random Walks on Random Lattices: Excitation Trapping and Annihilation Simulations	335
<i>R. Kopelman, J. Hoshen, J. S. Newhouse, and P. Argyrakis</i>	
Trapping of Excitation in the Average <i>T</i> -Matrix Approximation	345
<i>D. L. Huber</i>	
Diffusion in Random One-Dimensional Systems	355
<i>J. Bernasconi and W. R. Schneider</i>	
Random Walks on Inhomogeneous Lattices	363
<i>P. W. Kasteleyn and W. Th. F. den Hollander</i>	
Random Walks on Random Lattices with Traps	373
<i>V. Halpern</i>	
Diffusion-Controlled Reactions among Stationary Sinks	383
<i>Robert I. Cukier</i>	

Stochastic Aspects of Biological Locomotion <i>Ralph Nossal</i>	391
Physics of Ligand Migration in Biomolecules <i>Peter Hanggi</i>	401
Protein Folding as a Stochastic Process <i>Nobuhiro Gō</i>	413
From Random to Self-Avoiding Walks <i>Cyril Domb</i>	425
Renormalization Group Description of Polymer Excluded Volume <i>Karl F. Freed and A. L. Kholodenko</i>	437
Self-Avoiding Walks with Geometrical Constraints <i>S. G. Whittington</i>	449
Monte Carlo Renormalization Group Calculations for Polymers <i>M. Muthukumar</i>	457
On Pearson's Random Walk and Some Statistical Properties of a Quasiperiodic Observable in a Simple Quantum Model <i>F. T. Hioe</i>	467
Random Walk Properties of Lattices and Correlation Factors for Diffusion via the Vacancy Mechanism in Crystals <i>Masahiro Koiwa and Shunya Ishioka</i>	477
Energy Transfer as a Random Walk with Long-Range Steps <i>A. Blumen and G. Zumofen</i>	487
Random Walk to and Interaction with an Impurity <i>Peter M. Richards</i>	497
Diffusion in Concentrated Lattice Gases <i>K. W. Kehr</i>	509
Stochastic Processes Originating in Deterministic Microscopic Dynamics <i>Detlef Dürr, Sheldon Goldstein, and Joel L. Lebowitz</i>	519
Random Walk of Dislocations Following a High-Velocity Impact <i>Bruce J. West and Michael F. Shlesinger</i>	527
Kinetics of Adsorption on Stepped Surfaces and the Determination of Surface Diffusion Constants <i>C. H. Wu and E. W. Montroll</i>	537
Equilibrium Folding Pathways for Model Proteins <i>Sanzo Miyazawa and Robert L. Jernigan</i>	549
Future Contributions to <i>Journal of Statistical Physics</i>	561
